2-Way Brace

3-Way Brace

Girder

Braces

This section displays three red structural components. The 2-Way Brace is a T-shaped piece with a central square hole and two perpendicular arms. The 3-Way Brace is a similar T-shaped piece but with three arms. The Girder is a long, curved beam with multiple square holes and a central slot. A rounded label at the bottom identifies these as 'Braces'.

Structural Building Components

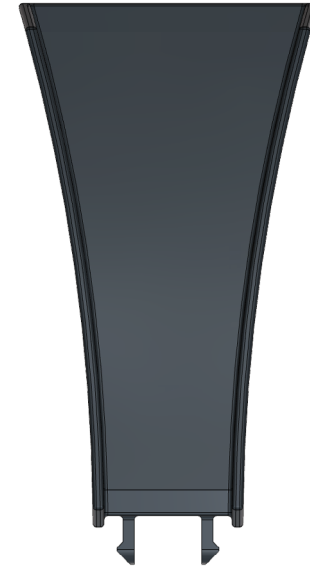

This section displays various structural building components. It includes a grey 'Beam' (a long vertical stack of square holes), a grey 'Half Beam' (a shorter vertical stack), a grey 'Riser' (a vertical piece with two holes), a red 'Block' (a square frame), a yellow 'Double Snap Block' (a square frame with four protrusions), an orange 'Mini Curved Beam' (a short curved beam), a dark red 'Small Curved Beam' (a longer curved beam), and a dark grey 'Single Snap Block' (a square frame with two protrusions). A rounded label at the bottom identifies these as 'Structural Building Components'.
