

Ripken Foundation At-Home STEM Kits

Sphero BOLT

Congratulations on your new Sphero BOLT!

The BOLT is an app-enabled robot that you can program to do some pretty cool things, like navigate a maze, act as a timer, or even play games! You can use a phone, tablet, or computer to interact with the BOLT. Download the Sphero Edu app and pair it with your BOLT to access its ready-to-use activities. There are additional resources available from Sphero on their website and social media platforms.
